

México Territorio Creativo

México Territorio Creativo (Creative Territory) MTC is an initiative by Design Week Mexico with joint efforts by local designers interested in promoting and exhibiting contemporary Mexican design. Through each design we express our dedication to creative processes, materials and production methods. Together we share a passion for mixing global innovation with high quality traditional craft as key part of our philosophy.

MTC brings together for Wanted Design a perfect blend of well-established and up-and-coming talent from designers, architects, artists and artisans studios by gathering their ideas on a design that is profoundly shaped by its origins and enhanced by its role in the present day.

Presenting a curatorial vision that gathers a complete selection of work that examines, promotes and updates the perspective of present day Mexican design, it's paradigms and their commitment in celebrating local creativity.

Directed by:

Emilio Cabrero - General Director of Design Week Mexico

Andrea Cesarman - Design and Design House Coordinator

Marco Coello - Cultural Coordinator

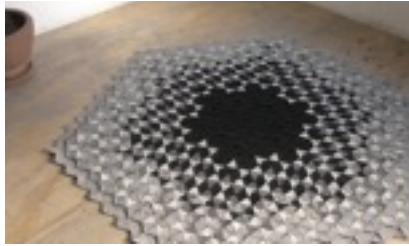

Jaime Hernández - General Coordinator

México Territorio Creativo
